DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 2, drawn to peptide mediating cell permeability.

Group II, claim(s) 3- 7, drawn to a DNA molecule.

Group III, claim(s) 8, drawn to a method of preparing a CPP.

Group IV, claim(s) 9, drawn to an antibody.

Group V, claim(s) 10 and 11, drawn to a use of CPP for mediating cell permeability to substances.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is directed to a polypeptide mediating cell permeability which is the first product. However, because Wieprecht (from Biochemistry 1997, cited in 409) discloses a peptide (page 12873, Table 1) that meets the limitation of the sequence of claim 1, no special technical feature exists for Group I as defined by PCT Rule 13.2, because it

Art Unit: 1648

does not define a contribution over the prior art. Note that the claims lack unity under PCT Rule 13.2 and thus the application lacks unity. Note that PCT Rule 13 does not provide for multiple products or methods within a single application. Because the technical feature of Group I is not a special technical feature, and because the technical features of the Group II-V inventions are not present in the Group I claims, unity of invention is lacking.

Groups I, II, and IV are drawn to structurally different compounds (peptide, DNA, and antibody). The CCP (Group I) can be made by the method of Group III or by automated peptide synthesis. The peptide of Group I can be use in the method of Group V or used to make the antibody of Group IV.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
